**Teaching Assistant at Barcelona School of Economics** 2017  
*Barcelona School of Economics (BSE), Barcelona, Spain*

## RESEARCH IN PROGRESS

---

**The Effect of Party Polarization on Environmental Policy. Evidence from Textual Data**

**What's on the News? Mass Media and Persistent Slumps**

In this paper, I document that mass media become more coordinated in economic reporting when the economy is in a recession. I present a model that incorporates time-varying imperfect common knowledge to study the role of mass media in generating persistent economic slumps. As newspapers become more coordinated, economic conditions become increasingly more common knowledge among firms. During a recession, the decision of firms not to invest is amplified because they are aware that other firms are also not willing to invest. As a result, mass media contribute in turning an otherwise mild recession into a persistent slump.

## SEMINARS AND CONFERENCES

---
